

## Professional Engineer - Structural

### About Karagozian and Case, Inc.

Karagozian & Case, Inc. (K&C) is an internationally recognized multidisciplinary science and engineering consulting firm founded in 1945. K&C's mission is to engineer specialized solutions and products for the defense, space, energy, security, construction and manufacturing industries. K&C's rapidly growing practice areas include: 1) applied research and testing; 2) modeling, simulation and analysis; 3) product and software development; 4) protective design engineering; and 5) threat and vulnerability assessments.

### Career Opportunity

K&C is currently hiring professional engineers with 3-5 years of structural engineering experience for our Los Angeles office. The candidate should have experience, coursework, or an expressed interest in the following areas: (1) structural engineering design, (2) dynamic nonlinear structural analysis, (3) FEA and/or computational mechanics, (4) numerical programming (e.g., MATLAB, at a minimum), (5) computer-aided drafting (e.g., AutoCAD and/or SolidWorks), (6) technical writing, and (7) experimental testing. Travel may be required.

This position avails interested candidates of the opportunity to work on iconic structures (i.e., supertall, stadiums) and high-profile projects throughout the world while being mentored by leaders in the field of structural analysis for blast and impact loads. Participation in technical conferences is supported.

### Candidate Requirements

- Master of Science (Min.)
- U.S. Permanent Resident (Min.)
- 3-5 Years' Experience.
- Excellent Speaking and Written Skills.
- P.E. license and S.E. a plus
- Interest in highly technical problems.

Interested candidates should send a resume and cover letter to [careers@kcse.com](mailto:careers@kcse.com).
