## SOFTWARE ENGINEER I/II

### Career Opportunity

K&C is seeking a highly talented Software Engineer. The ideal candidate must have programming experience with C/C++ or any other language that is comparable; have a solid understanding of programming paradigms (e.g., functional, object-oriented); and understand software engineering best practices.

Additional experience in one or more of the following is a nice to have. Solving quantitative problems; a strong knowledge of algorithms and computational complexity; and experience working with large data sets such as those produced by finite element and/or computational fluid dynamics codes. Experience with real-time game engines such as Unity or Unreal. Experience with AWS or other cloud providers.

A successful candidate must be able to work, think, and innovate independently in a fast-paced work environment with challenging time constraints. The ability to multi-task and work on projects that require varying skill-sets simultaneously is a must.

### Candidate Requirements

- BS, MS, or PhD in Computer Science or Related Quantitative Science Field such as Astronomy, Physics, Applied Mathematics, Biomechanics, Computational Biology, or Chemistry.
- US Citizen
- Strong math skills including linear algebra and multivariate calculus.
- Must enjoy tackling complex research problems and novel software solutions.
- Interest in solving highly technical and challenging science and engineering problems.
- Experience with C or C++, FORTRAN and LINUX OS.
- Experience with AWS or cloud-service providers
- Experience with real-time engines, such as Unity or Unreal

### Company Description

Karagozian & Case, Inc. (K&C) is an internationally recognized science and engineering consulting firm that was founded in 1945. K&C's mission is to be the leader in innovating and fielding: 1) engineering software tools, 2) high-fidelity physics-based computational tools, 3) structural and mechanical systems, and 4) engineering services by leveraging state-of-the-art research, analysis, and design methods. K&C serves clients in the defense, counterterrorism, construction, manufacturing, space, energy, and insurance industries. Our strength lies in our team of experts and our culture of collaboration.

K&C's services commonly fall into the following functional areas of expertise.

- Modeling, simulation, and analysis.
- Applied research and testing.
- Product and software development.
- Protective design.
- Threat and vulnerability assessments.
