About Karagozian and Case, Inc.

Karagozian & Case, Inc. (K&C) is an internationally recognized multidisciplinary science and engineering consulting firm founded in 1945. K&C's mission is to engineer specialized solutions and products for the defense, space, energy, security, construction and manufacturing industries. K&C's rapidly growing practice areas include: 1) applied research and testing; 2) modeling, simulation and analysis; 3) product and software development; 4) protective design engineering; and 5) threat and vulnerability assessments.

Career Opportunity

K&C is currently hiring entry-level or experienced Engineers with interests in designing, assessing, and analyzing structures to extreme loads and environments. The interested candidate should have coursework in the following areas: (1) advanced structural engineering design, (2) finite element analysis and/or computational mechanics, (3) numerical programming (MATLAB, at a minimum), (4) computer-aided drafting (AutoCAD, SolidWorks, etc.), (5) technical writing, and (6) experience, or at least interest, in field or lab testing.

This is a great opportunity for experienced engineers looking to grow their careers in an innovative and entrepreneurial company. Entry-level engineers will have a unique opportunity to work under the supervision of an experienced structural engineer specializing in blast, impact, thermal, and explosive effects on structural and mechanical systems.

Candidate Requirements

- Master of Science (Min.)
- U.S. Permanent Resident (Min.)
- 0-5 Years' Experience.
- Excellent Speaking and Written Skills.
- Self-motivated.
- Interest in highly technical problems.

Interested candidates should send a resume and cover letter to careers@kcse.com.
